

**Jocelyn Gan '13** (*Environmental Science*)

Energy & Sustainability Specialist, NYU Langone Health

Jocelyn Gan currently serves as the Energy & Sustainability Specialist at NYU Langone Health, managing the organization's sustainability program. She leads initiatives that institutionalize environmental best practices and build a culture of sustainability across a growing building portfolio of more than 13 million square feet to reach its carbon neutrality goal by 2050. Her work supports programs in sustainable food services, energy and resiliency management, chemical and waste reduction, among other efforts. NYU Langone's robust program has earned more than 65 energy and environmental excellence awards for its sustainability achievements and, in 2020, the institution proudly joined the national US Health Care Climate Council.

Jocelyn received her MS in Sustainability Management from Columbia University, and her BS in Environmental Science from the SUNY – College of Environmental Science and Forestry.
